Professional Summary

B.Tech Artificial Intelligence and Data Science fresher with a strong foundation in Python, SQL, Data Structures, Machine Learning, and Data Science. Developed academic projects in AI and software development, with an interest in building practical and efficient solutions. Passionate about Software Development and AI/ML, with a strong willingness to learn and adapt to new technologies. Seeking an entry-level SDE or AI/ML opportunity to apply my skills and grow professionally.

Education

Dhanalakshmi Srinivasan Engineering College (A), Perambalur	2023 – 2027
B.Tech, Artificial Intelligence & Data Science	CGPA: 7.87
S.E.T Vidhya Devi Matriculation Hr. Sec. School, Alivalam	
Higher Secondary Education (HSE)	79.3%

Technical Skills

Programming: Python, SQL

AI & Machine Learning: Machine Learning, NLP, Generative AI

Data Science: NumPy, Pandas, Data Analysis

Web & Backend: HTML, CSS, FastAPI

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

Core Skills: Debugging, Logical Thinking, Teamwork, Quick Learning

Experience

AI/ML Intern	August 2026 – Present
<i>Codomax Digital Solution</i>	

- Working on AI and Machine Learning concepts through practical projects and development tasks.
- Applying Python and Machine Learning techniques to solve real-world problems.
- Exploring Generative AI, LLMs, and AI application development.
- Collaborating with team members to understand requirements, implement solutions, and improve technical skills.

Project Experience

Career AI – AI-Powered Career Guidance Platform. *Academic Team Project*

- Developed an AI-based platform to provide personalized career guidance for students and job seekers.
- Implemented features including AI career mentoring, resume analysis, skill assessment, and career roadmap generation.
- Worked with NLP and Generative AI concepts to provide personalized recommendations.
- Contributed to the development and integration of the application as part of a college team project.

Disease Prediction System. *Self-Learning Project*

- Developed a machine learning-based system to predict diseases based on user-provided symptoms.
- Used Python, Pandas, NumPy, and Scikit-learn for data processing and model development.
- Applied machine learning algorithms and evaluated model performance.
- Designed a simple interface to make the prediction system easy to use.
- *Tech Stack:* Python — Pandas — NumPy — Scikit-learn — Machine Learning — FastAPI

Certificates

- Python – Coursera
- AI for Beginners – HP LIFE
- Foundations of Data Science – Analytics Vidhya
- Introduction to Data Science and Analytics – HP LIFE

Interests

- Artificial Intelligence & Machine Learning
- Generative AI & Large Language Models
- Software Development
- Problem Solving & Competitive Programming
- Building Real-World AI Applications
- Learning Emerging Technologies
